Chief, Medicine Division/SI

The quantity of Polish medical manpower.

1. During fiscal 1960, OSI/M will produce a paper on Poland's capabilities and trends in medical sciences. Included in this paper will be the quantity of medical research manpower.

2. We request that the following study be done by OSI: Prepare a short report which includes the following details on Polish medical research manpower:

a. The total number of persons engaged in medical research who hold a doctors' degree of any kind.

b. A breakdown of the above figures to show how many hold the Ph D degree only, and how many hold the M. D. degree only.

c. The total number of physicians (M. D.) in Poland (including clinical practitioners both general and specialized).

d. Any breakdown possible for substantive specialties of the above i.e. the number of Ph D's in Biochemistry, Physiology, Pharmacology etc., and the number of M. D.'s in each clinical speciality.

3. The studies requested should be carried out within the limitations of existing OSI capabilities and should be submitted to OSI/M by 1 January 1960.
